TheMILE

TheMILE

multi-carrier shipping – cross-border.

Imagine a system that caters to all your transport management needs, from planning to the last mile. A comprehensive solution, easy to use, that grows with your needs and provides the visibility of the supply chain as you want.
We from 3MWORKS have it for you.

Our supply chain expert team helps roll out The Mile at your locations and integrate it with your 3PL ecosystem, tailors the solution, and gives you the ability to adapt the most advanced supply chain innovations. We make your deliveries faster, cost efficient, and reliable.

Advanced functional coverage, optimized for seamless delivery

The Mile was developed by IT and supply chain professionals. Our solution yields a very broad and competitive range of functionalities. Moreover, it works perfectly with our warehouse management system 'WareWise'.

Our solution provides the means for omnichannel and end-to-end management of the transport chain: Truck, train, ship, drones, and other transport channels.

5 great reasons
to make The Mile a pillar
of your Enterprise IT

1 Manage complex multi-tier transport processes end-to-end from anywhere

All you need for transport management in one application suite – from transport planning to POD. The Mile provides transparency of the transport processes in real-time on desktop or mobile.

2 High level of automation and integration

APIs allow integration with your WHM and data exchange with 3PL providers. Automatic data capture, for example via RF, RFID, QR, and barcodes, is available.

### 3 Flexible, modern, cost-efficient technology platform

On-premise. Cloud, or SaaS. And we develop our software without proprietary programming languages. That makes our code easy to maintain.

4 Comfortable extensibility, customization, and integration

APIs throughout the system enable integration with other applications. Even complex new interfacing is feasible at low cost.

5 Advanced analytics and visualization

Our ecosystem comprises the market leaders for data analytics and visualization. You can extend The Mile's data extracts, graphics, and apply AI analytics capability straight forward with limited effort and technical knowledge.

TheMILE
at a glance.

Example features

Fleet Management

Customers & Contracts

Advanced planning

3PL Logistics

Workforce and auto-trip assignment

Cross-docking

Shipment orders

Delivery timeline forecasts and real-time tracking
